

Process Mixing Systems

Vaughan's Rotamix System is today's most cost effective means of mechanical mixing, consisting of an arrangement of floor mounted nozzles fed by a Vaughan Chopper Pump. Using custom engineering software, each application is analyzed and sized by Vaughan in order to achieve the desired mixing effect. The Rotamix system may be applied in circular, rectangular, and oval tanks and basins, and other unique process configurations such as egg shaped digesters, CSO tunnels and pump stations.
